## UR-30H10 30 Ton 4 inch stroke Ultra High Pressure Double Acting Hydraulic Cylinder

\$1,885.71

**The Ultra High Pressure Double Acting Cylinder** offers lighter weight and higher efficiency due to its higher operating pressures. Excellent replacement cylinders for tight spaces and in situations where weight is critical.

**Features:**

1. Manufactured from extremely high strength lightweight alloy to endure high operating pressures while keeping weight to the bare minimum.
2. Hard chrome plated ram endures harsh environments and extends cylinder useful life. Replacement seals available for purchase separately.
3. Designed with high lateral load tolerance of up to 50% of lifting capacity.
4. Double acting design increases controllability of cylinders allowing smooth operation of equipment.
5. Larger units are equipped with carrying handles to ease transportation and placement of cylinders.

Details

**The Ultra High Pressure Double Acting Cylinders** offer lighter weight and higher efficiency due to their higher operating pressures excellent replacement cylinders for tight spaces and in situations where weight is critical. Very close in weight to similar aluminum cylinder yet smaller in size and more durable. These units can be found operating in nuclear power plants, diamond processing plants and shipyards around the world. **These Ultra High Pressure Cylinders** must be paired with an Ultra High Pressure Hydraulic Pump that we offer in either manual hand powered or electrically powered. Our couplers and hoses must be used as well due to the high operating pressure.

## Additional Information

<b>Capacity</b>	30 Tons
<b>Minimum Height</b>	9.45"
<b>Max Height</b>	13.39"
<b>Base Area</b>	3.35" (dia)

## What's Hot

1.5 Ton Aluminum Service Jack
